Assignment 2   Software Engineering   3 Marks
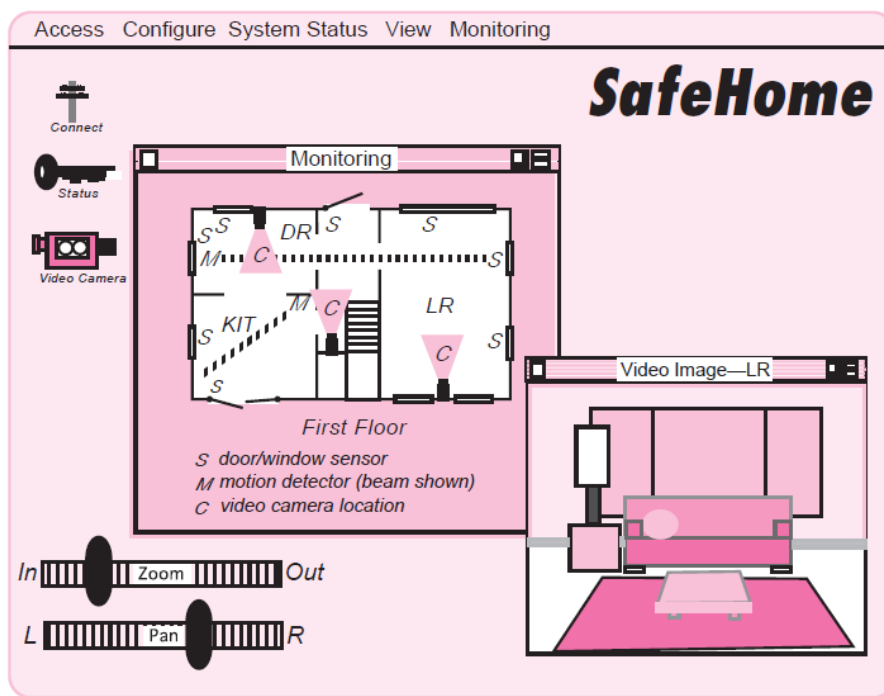

You have seen the safeHome case study, which is an intelligent software. In context of the case study pdf (already given to students), and in the framework of GUI design golden rules, complete following two questions.

1. Develop a set of screen layouts with a definition of major and minor menu items for the SafeHome system. You may elect to take a different approach than the one shown for the screen layout in following figure.

2. Provide 2 examples that illustrate why response time variability can be an issue in this system.
